

Environmental management and energy efficiency policy

Avanza, a responsible company committed to protecting the environment and ecosystems

Our commitment

The Senior Management of Avanza, aware of the importance of improved sustainability, energy efficiency and pollutant emissions reduction, contributes to the environment by fostering the rational use of natural resources, reuse or recycling and energy savings, acting to prevent pollution, by improving

waste management and reducing impact, through the environmental integration of our services.

Avanza aims to go beyond strict compliance with regulatory and legislative requirements, by integrating and implementing the decisions needed in its daily management to make it more effective, furthermore promoting environmental good practices among all stakeholders.

- Provide a reference framework to establish, review and periodically evaluate **environmental, energy efficiency and driving efficiency objectives and targets**, as well as the environmental management policy, for continuous refinement.
- Ensure the **availability of information** and **resources** as required to achieve environmental and energy efficiency objectives and targets.
- **Fulfil** the **expectations and needs** of environmental stakeholders.
- **Continuous improvement** of environmental conduct, energy performance and driving efficiency.
- Apply **actions focused on preventing** pollution, protecting the environment, making sustainable use of resources and protecting biodiversity and ecosystems.
- **Reduce environmental impacts** from its operations by reducing consumption and emissions.
- **Reduce the generation and sources of waste**, ensuring that all waste generated is transported and eliminated or recycled according to the corresponding type, following good practices for environmental management.
- Conduct **energy reviews and environmental management audits** with the aim of minimising energy consumption and potential risks for the environment, facilitate the detection of opportunities for improvement, and guarantee fulfilment of the objectives set.
- Comply with all **legal requirements** in terms of management policy and environmental, energy and efficient driving regulations, along with any other environmental and energy commitments that the organisation signs up to in connection with environmental aspects, energy use and consumption, and energy efficiency.
- Consider and plan the departments responsible for **environmental and energy criteria** when incorporating new **product specifications, materials or services**.
- Support the acquisition of **energy-efficient products, equipment and services** and design to improve energy performance and efficient driving.
- Foster **training, information** and **active participation by employees** to establish a system of environmental good practice, helping to reduce energy consumption by installations, vehicles and equipment.
- Support **innovative solutions** within the scope of efficient driving, and implement measurement indicators to improve operations, and to prevent, reduce or eliminate those factors with a negative impact on efficient driving.
- Conduct the relevant **actions** to reduce potential environmental risks.
